Expert Lecture on Career Opportunities for Chemical Engineers in the Pharmaceutical Industry

The Department of Chemical Engineering, MNIT Jaipur, organized an expert lecture by **Mr. Ashish Bhatnagar, Pharmaceutical Industry Consultant**, on the topic *"Role of Chemical Engineers in the Pharmaceutical Industry."*

With an impressive **40 years of experience in Active Pharmaceutical Ingredient (API) operations** under current Good Manufacturing Practices (cGMP), Mr. Bhatnagar shared valuable insights into pharmaceutical manufacturing, unit processes, and industrial operations.

He interacted with students, discussed diverse career opportunities in the pharmaceutical sector, and guided them on building successful careers in the industry. He also highlighted the growing role of chemical engineers in **carbon trading, sustainability initiatives, and achieving environmental sustainability goals**.

The session provided students with valuable industry perspectives and strengthened the connection between academic learning and industrial practices.

We sincerely thank Mr. Ashish Bhatnagar for sharing his extensive experience and inspiring our students.
